### Events

## **Everything is Energy Show Topics for Episode #418 01/16/14:**

- Details of newly revealed Hereditary imbalances added to the AIM database
- Frequencies similar in nature to Polio: lots of them, potential signs of having and/or healing them, and the importance of maintaining muscle flexibility as we age.
- Insightful discussion on how and when we heal emotional imbalances, largely our role in this process and how EMC2 strives to assure all the balancing energies possible to assist us are in the AIM database.
- Even if showing to be Hereditary imbalance-free, a participant will still have unresolved Hereditary emotional imbalances, and usually, something that is dominant. Unlike healing Hereditary imbalances, it isn't a matter of survival; it could well be a choice you have to make, one that may be a part of choosing to recognize your connection to everyone and everything.
- An emotion that is associated with a given imbalance may not be the same emotion in everyone who has the imbalance.
- Recent reports of increased radiation levels on the West Coast and what Stephen can and cannot check energetically.

## Newly Revealed Hereditary Frequency Update As of January 16, 2014

**This week there were four new Hereditary frequencies revealed to us.**

The first new Hereditary frequency 7954 was revealed to us and added to the AIM Program on January 13, 2014. This frequency is believed to function within the energetic orbs of the Urinary Tract, Bladder, Liver, Brain, Lungs and Respiratory System. It may manifest itself through the unresolved emotional etiologic frequency of: Judgemental. At this time we are not sure how common this will be among AIM Participants.

The second new Hereditary frequency 7964 was revealed to us and added to the AIM Program on January 14, 2014. This frequency is believed to function within the energetic orbs of the Skin, Brain, Circulatory System and Colon. It may manifest itself through the unresolved emotional etiologic frequency of: Aggravation. At this time we are not sure how common this will be among AIM Participants.

The third new Hereditary frequency 7915 was revealed to us and added to the AIM Program on January 14, 2014. This frequency is believed to function within the energetic orbs of the Lungs, Respiratory System, Muscles and Joints. It may manifest itself through the unresolved emotional etiologic frequency of: Impatience. At this time we are not sure how common this will be among AIM Participants.

The fourth new Hereditary frequency 7925 was revealed to us and added to the AIM Program on January 14, 2014. This frequency is believed to function within the energetic orbs of the Heart, Muscles and Joints. It may manifest itself through the unresolved emotional etiologic frequency of: Withdrawal. At this time we are not sure how common this will be among AIM Participants.

**Here is the update on past frequencies that were revealed and added to the AIM Program last week:**

7913, 7923, 7933, 7943, 7953, 7963, 7924 & 7934 We believe have balanced in all those AIM Participants who were clearing them.

7914 We believe will balance in all those AIM Participants who are clearing it by the end of this weekend.

Regarding the frequencies that have cleared, we clarify: "We cannot say with certainty or accuracy that they have cleared in all, because we cannot check all. Additionally, some heal more slowly because of underlying energetic weakness, such as the frequency of parasites."

**REMINDER:** Although the frequencies have balanced in those who are positive for them, we may have to allow our physical being to strengthen to notice the positive effects.

## Olivia from Florida

When doctors informed me that my daughter, Olivia, had Down Syndrome, I knew that my family would endure some difficult challenges, but I never wavered in my belief that we would rise to the occasion with our love and resiliency. Despite the worst-case scenario horror stories that I read about in books written about people with Down Syndrome, Olivia is a healthy, active, beautiful child. Because she has been blessed with a loving, doting family and skilled, caring therapists, she rides a bicycle, maneuvers the playground like a skillful gymnast and writes and colors like most typical six-year-olds; however, although Olivia excels in her fine and gross motor skills, her speech and cognitive skills are still very much delayed. When a friend suggested that I put Olivia on the AIM Program, I did not waste any time.

Putting Olivia on the AIM Program was one of the best decisions I made. Within three months, Olivia's articulation began to improve. Instead of one-word utterances, Olivia began stringing three words together. Just recently, she has begun to speak using more sentences. In addition to improved speech, her cognition and focus have also improved. For the first time in her kindergarten class, Olivia earned a "C" on a math assessment, which is quite a leap for a girl who could not identify numbers 6 through 10 in August! Then to my utter surprise, Olivia received an "A" on her oral presentation of Helen Keller. Yes, you read correctly. How does a six-year-old who has significant speech delays get an "A" on an oral presentation? I wholeheartedly believe that so much of Olivia's progress is due to the energetic balancing of the AIM Program.

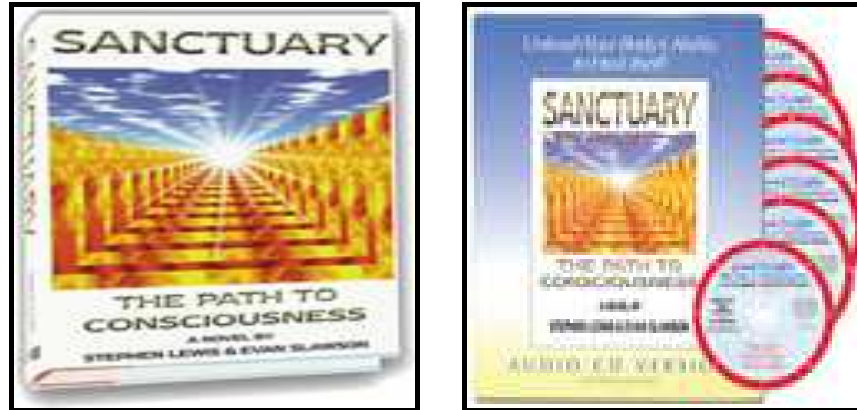

Moreover, because she is more focused, she is able to work more independently, which is a huge boom. The more independent work she can do the more likely it is that she can continue to attend the neighborhood school. Because Olivia has made so much progress, her teacher nominated her for student of the month in her special education class. My parents and I cried as we watched Olivia mount the platform to accept her certificate. Just last year, I lamented that Olivia may never get the awards her typical brother earns.

I am firmly convinced that Olivia would not have made such rapid progress this year with her speech and

cognition had it not been for the AIM Program.
